DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 12/08/03 fails to comply with 37 CFR 1.98(a)(1), which requires the following: the correct application number of the application in which the information disclosure statement is being submitted on each page of the list; a column that provides a blank space next to each document to be considered, for the examiner's initials; and a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The endoluminal therapeutic device is not an endoluminal delivery device. Examiner is not clear whether applicant intends to claim an apparatus including both delivery device and a device being delivered or just a delivery device.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3731

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 20, 21, 22 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Yurek et al. (5,662,703). Yurek et al. disclose a delivery device comprising: an elongated flexible tubular catheter (18) having a narrowed, tubular distal tip (26) being formed of a yieldable material from elastomer (col. 5, line 3-10), the distal tip having an opening with diameter smaller than a portion of a stent, wherein the distal tip has a frustoconical shape (fig. 5). Note: The introductory statement of intended use and all other functional statements have been carefully considered but are deemed not to impose any structural limitations on the claims distinguishable over the Yurek et al.'s device which is capable of being used as claimed if one desires to do so.

In regarding to claim 22, since the therapeutic device is not positively claimed (see 112 rejection above), examiner consider the delivery device of Yurek et al. adapted to capture within its distal tip any therapeutic device in the art having a stem portion with an enlarged portion that is larger than the opening of the distal tip.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 3731

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 20-23 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 of U.S. Patent No. 6,679,903. Although the conflicting claims are not identical, they are not patentably distinct from each other because they contain the same subject matters.

8. Claims 20-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 of U.S. Patent No. 6,319,267. Although the conflicting claims are not identical, they are not patentably distinct from each other because they contain the same subject matters.

9. Claims 20-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 6,102,932. Although the conflicting claims are not identical, they are not patentably distinct from each other because they contain the same subject matters.
